

Acculevel Replacement Parts for John Deere Sidehill Combines

9500 and 9510 John Deere Sidehill Leveling Control Box. The Rahco retrofit leveling control box uses an electronic clinometer to sense level instead of a mechanical pendulum. It is the same sensor Rahco uses on the Acculevel 18 Sidehill Conversion. This weatherproof control box houses the sensor and a circuit board. The circuit board has three electronic adjustments which are: set level, filter, and sensitivity. It will bolt on to the existing mounting holes and will plug right into the existing wiring harness. This box also carries a 2 year warranty.

Acculevel Sidehill Drive Shafts with Constant Velocity Universal Joints and a Quick Coupling Yoke. These shafts are built to the specifications of John Deere's Sidehill drive shafts, with the addition of a quick coupling yoke. All of the repair parts are the same as John Deere's except the quick coupler. These shafts are for the Acculevel 18 Sidehill Conversions and can be used on John Deere Sidehill Combines.

John Deere 1-1/8" Hex Part Number	AH141138
Acculevel 1-1/8" Hex Part Number	18JD51101
Acculevel 1-1/4" Hex Part Number	18JD51103
Acculevel 1-1/2" Hex Part Number	18JD51104

Acculevel Sidehill Drive Shaft Quick Coupling Yokes. These yokes can be added to existing John Deere Sidehill Drive Shafts to replace the bolt-on style coupling yokes. The same universal joints are used, so updating and maintenance are hassle-free.
